ThomCo Enterprises, Inc.

Ladies and Gentlemen:

ThomCo Enterprises Inc. is a **full service construction**, construction management, and facility management company. We provide our clients extensive knowledge in managing the **various facets of construction** and its related industries. Since 1992, we have been active in providing **renovations, new construction, roofing repairs, estimating, design build**, and facility management/maintenance for our governmental and commercial client base. We specialize in multi-discipline, indefinite quantity/indefinite delivery type contracts through which we have successfully developed partnerships with our customers. Our project management team networked with strong subcontractor alliances give ThomCo a competitive advantage deciphering our customers needs as we strive to exceed expectations.

Since our inception, we have developed and refined a customer sensitive management approach that integrates seamlessly with our government clients. We have successfully completed over five hundred projects (some large, some small, some very complicated, some routine). Our goal is to excel regardless of the size of project. In building a portfolio as diverse as ours, we've learned a lot and offer the benefits of these invaluable experiences to you as part of your team. Our focus on planning and implementation as well as our success in producing results is unparalleled.

Thomco has recently reviewed and updated the company's strategic initiatives to better serve a broader client base. The strategic initiatives will focus on the development of both commercial and governmental construction projects and construction management opportunities and will seek to support other minority owned businesses in the area in pursuing mutually beneficial opportunities. In addition, Fred Thomas has recently formed a real estate development company, Fred Thomas Development Co., Inc. to provide unique commercial and residential real estate development opportunities in the Greater Northwest Florida area.

Thomco has also recently acquired and renovated a new facility to relocate its corporate headquarters. This new facility doubles the corporate office space to approximately 7000 square feet and adds a 6500 square foot warehouse. Currently holding multi-year construction contracts with Hillsborough County, the U.S. Postal Service and the University of West Florida among others, the new headquarters significantly enhances our ability to service our existing customers, as well as providing room for future growth.

ThomCo Enterprises Inc. has developed a reputation for **tenaciously overcoming design and site constraints, maximizing economic opportunities, and formulating practical solutions** for our clients. With our broad based background of challenging experiences and our solid record of success, ThomCo offers much more than traditional construction firms. As our current and previous clients will confirm, we've helped them meet their design, construction, and management needs by using hands on services to achieve the desired results.

Sincerely,

Fred Thomas

President

ThomCo Enterprises, Inc.

Multiple Needs... One Solution... *Building Industry Gurus...Delivering Only Grand Satisfaction!!!!*

A measure of our competitive strength is evident in our portfolio of government contracts executed within the last five years. Undoubtedly, our core competencies lie in the effective execution of Indefinite Delivery / Indefinite Quantity, General Construction and Renovation, and Housing Maintenance contracts.

General Construction & Renovation, Start to Finish

From conceptual phase through project closeout, we excel in timely, high quality, cost effective construction and renovation:

**Conceptual / Pre-design Planning
Value Engineering and Final Design
Estimating, Negotiations, and Procurement
Total Project Management, QC, & Safety Programs
Project Closeout and Warranty Execution**

Multi-Discipline/Multi-Project/Indefinite Delivery / Indefinite Quantity Contracts

We have combined our technical expertise with our strengths in operational management and planning to excel in the performance of indefinite delivery / indefinite quantity contracts of various disciplines:

**Design-Build Construction
Fast Track Estimating, Negotiations & Procurement
Multi-Task Order Management
Pulsar & Progen, Exactimate Estimating Proficiency
Superior Customer & Supplier Networks**

Facility and Military Family Housing Maintenance

We provide the management, labor, inventory, and equipment to maintain the suitability and availability of government housing:

**Routine, urgent, and emergency maintenance/ repairs
Change of Occupancy Maintenance / repairs
Associated activities: Extensive inventory control,
Inspection, appliance repair, industrial cleaning**

Disaster Management/Debris Removal Services

We provide the management, labor, inventory, and equipment to support disaster management and debris removal operations, such as debris hauling, load and haul, emergency repair, temporary roof repairs.

**Routine, urgent, and emergency disaster management
Load and Haul, Chip Hauling, Debris Removal
Emergency and Temporary Roof Repairs in support of FEMA**

Malcolm Miller-Jones.— Vice President of Operations

Functional Role and Responsibilities

Malcolm is our Company Operations Manager. He is responsible for all construction operations throughout the companies operating area to assure that staffing levels, Management Controls and Quality standards are maintained on all projects.

Career Highlights

Malcolm started his career with M.W. Kellogg as a piping draftsman in NYC. During summers, while studying at Bowling Green State University, he worked as a union Operating Engineer in New York City. Upon completing studies and an honorable discharge from the US Army in 1969 he worked for Turner Construction Company in increasing levels of responsibility; In Boston as a Field Engineer, Estimator, Project Superintendent; Wheeling W.V. as Construction Manager on a Countywide School rebuilding program and Wheeling Hospital; Cincinnati as Contract Manager and Business Development Manager; Washington DC as Director of Correctional Facilities for Turner Corporation and Project Executive responsible for more than \$60 million of at-risk construction; In 1988 he was assigned to London, England as Managing Director of London Office w/ direct responsibility for more than \$600 million of at-risk construction management and design build projects.

23 yrs later, in 1992, Malcolm moved to Atlanta to form the At-Risk Construction Management Division for Heery International. He built the operations to a level of more than \$75 million annually. Work focused on K-12 school projects, design build projects for private and public clients, sports facilities and University work.

He has been actively involved with numerous related trade associations as education / training manager and as a speaker or trainer. With the Associated Builders and Constructors of Georgia, Malcolm developed the position of Director for Business Development, for members who wanted to encourage B2B membership interaction. He has been a featured speaker at the AIA National Convention, with Trade Associations and has spoken out across the USA and Abroad on the Construction Management Concept for Quality Project Delivery.

John Gross

Contract Type: Renovations to Sedalia Park Elementary School

Period of Performance: 22 September 2005 – September 2006

Total Contract Award: \$2,889,758

Description / Performance Quality

This project consists of constructing a single story classroom addition to the existing Walton Middle School. The building has a raised building pad with retainage/detention areas to control the flow of rainwater. The exterior wall consists of concrete masonry units with a brick veneer. Interior walls are constructed of CMU. The roofing system is standard bar joist and metal decking system with a standing seam metal roof to match that of the existing school. The interior finishes incorporate modern finishes seen in most new schools. There are cable systems installed in each classroom, along with additional audio capabilities to connect with other classrooms throughout the state. In order to accommodate the customers shortened performance period ThomCo expedite the work sequence of each subcontractor and our own forces in order to allow the school system to use the facility in the fall of 2002. We worked very close with the Architect and Engineers to eliminate problems (change orders) and delays, by a having an open communication between the Architect, the home office and the project Sr. Project Manager in the field. Our good relationship with the subcontractors allowed us to make the necessary changes and continue with the construction process. This provides us with a satisfied Owner at the completion of the project.

Contract Type: Fixed Priced / Building Addition and Alteration, Design Build

Period of Performance: November 2001

Total Contract Award: \$1,894,714, Owner Mods to 2,152,787

Description / Performance Quality

ThomCo Enterprises Inc. is renovating this forty thousand square feet (40,000 SF) facility to incorporate a new mechanical, HVAC, and electrical system for the structure. The four-story structure required extensive demolition of the entire utility structure. ThomCo replaced all the utilities (Fire water, Potable water, Sewer, Sprinkler System, Electrical, and HVAC) and provided design assistance/value engineering to the customer in order to contain cost and minimize change orders. In the course of the project ThomCo is providing Asbestos Abatement service along with engineering support and coordination of drawing and efforts for future construction phases.

Represents design/build type project.

GOVERNMENT-NEW CONSTRUCTION

Columbarium Barrancas National Cemetery

Contract # V520C-479, Project 828-CM3-021

Contract Type: Fixed Priced / New Construction, Design Build

Period of Performance: November 2000 – October 2001

Total Contract Award: \$2,158,650

Description / Performance Quality

Indicative of our diversified construction background, ThomCo Enterprises Inc has performed specialized work for the Veterans Administration. In this capacity, we constructed a 4,560 unit columbarium complex (mausoleum) at the Barrancas National Cemetery in Pensacola, FL. This multi faceted project demanded the use of numerous trades/crafts in accomplishing the required work. A sample of the work performed is as follows: cast in place concrete (600 + CYDs), pre-cast concrete (installation of 4560 columbarium units), landscaping, irrigation, electrical, pre-engineered metal building erection, storm drainage (design and installation of site drainage system) and roadway construction (asphalt driveways/curb and gutter system).

Extension: P00012 1 July 03 to 31 Dec 03

Extension to close out contract: Sept 05

Total Contract Award: Coefficient based, 50 million dollar max.

Description / Performance Quality

SABER contractor for Tyndall AFB. Employing approximately 30 employees of diverse skill levels and expertise, our ability to resourcefully integrate and manage sub contractors expedites productivity and sustains cost efficiency.

Providing design and building expertise in delivering both small and large dollar contracts, staff project managers accomplish most designs in-house. When an engineered solution, the production of stamped design drawings are required (design/build), we partner with local engineering firms to provide solutions to our customers needs. The majority of our projects start with a written scope of work, which our project managers and design team translate into working drawings. To date we have satisfied our customer with a total amount of work approaching 50 million dollars comprising (not limited to) the following major components of work: new construction, major/minor renovation of administrative and industrial space, extensive site work (airfields, paving, landscaping, site drainage, etc...).
